

*DSG has a wealth of knowledge about the entire spectrum of the healthcare a/v world including design, engineering, networking, installation, budgets, etc., and they tie it all together. They keep on top of current information. They are seasoned and highly knowledgeable.*

Rick Hall, AIA  
Principal | Health Care  
**Harley Ellis Devereaux**

*Working with Drake Systems Group is a true relationship - they really partner; they have a depth of understanding of buildings, user needs, staff needs, and higher-level physician needs. Their experience adds depth to every discussion. They also communicate appropriately and accordingly for each unique audience.*

Doug Gordon, AIA  
Director  
**KMD Architects**

*Drake knows their field, what works, and what new technology will reduce risk of failure, over spending, over analyzing, etc. They complement what we do, so it's a good team. DSG understands my project objectives, and helps me achieve them.*

Sandy Zirulnik  
**SafirRosetti**

*Drake Systems Group is the "go to" firm. They step up to the plate and resolve issues. They are personable, always available, and willing to work with the client. I encourage any client to tap into their depth of experience and knowledge. Get them in early!*

Patti Mitchell AIA, LEED AP  
Sr. Project Manager  
**University of California San Francisco Capital Programs & Facilities Management**

*I know that when Drake Systems Group is here, they take care of everything. I don't have to worry about tracking them down; they have a great work ethic and just get it done. They're about getting the job done right in the best possible way. I have no worries when I work with them. It's like bringing in a trusted advisor – they even send status reports without asking. They are very good with customers. They know how to deal with a variety of people, including difficult people.*

Patricia Reyes-Cappelli, AIA  
Senior Project Manager, National Facilities Services  
**Kaiser Permanente**
